

TOS 46 - Taylor Yard G2 Paseo del Río Project
December 28, 2020

On December 18, 2020, the City of Los Angeles Bureau of Engineering released a Task Order Solicitation (TOS) requesting proposals for the formation of a design services team for the Paseo del Río Project, the first project of the 100-Acre Partnership.

The design services team will be responsible for the Taylor Yard G2 parcel portion of the Paseo del Río Project, and will be led by the Bureau of Engineering. A complementary project is anticipated for the adjacent Bowtie parcel and will be led by the California Department of Parks and Recreation. Public engagement and outreach for the project will be managed by the Mountains Recreation and Conservation Authority.

The whole Paseo del Río project is planned to be approximately 8 acres, approximately 6 acres on G2 and 2 acres on Bowtie. The project is intended as an early activation project of the site and will consist of remediation and riverfront public access. Project elements may include trails, native habitat, water quality improvement features, greenspaces, trail recreational opportunities, kayak launch and landing, gathering spaces or outdoor classrooms, restorative elements, and other amenities.

The scope of the project is as follows:

1. Producing a Planning, Conceptual Design, and Pre-Design Report
2. Performing an Environmental Review and providing Environmental Documentation
3. Providing Detailed Design Services
4. Engaging in Design Services during Construction

The following is an anticipated schedule for TOS 46:

Issue Task Order Solicitation	December 18, 2020
Mandatory Pre-Proposal Meeting	January 6, 2021
Last Day to Submit Questions	January 15, 2021
Respond to Questions	January 29, 2021
Receive Solicitation Responses	February 12, 2021
Conduct Interviews	February 22 - 26, 2021
Select and Negotiate	March 12, 2021
Issue Task Order	April 30, 2021

The TOS for this project was distributed to the Pre-Qualified On-Call Wastewater and Environmental Engineering Services Consultant Contract list established by the Bureau of Engineering, which consists of the following prime contractors:

AECOM Technical Service, Inc.
Arcadis US, Inc.
Arup North America, Ltd.
Atkins North America, Inc.
Black & Veatch
Brown & Caldwell
Carollo Engineers
CDM Smith Inc.
CH2M Hill Engineers, Inc.
D R Consultants & Designers, Inc.
GeoSyntec Consultants
Hatch Associates Consultants, Inc.
Hazen & Sawyer, P.C.
HDR Engineering, Inc.
Kennedy/Jenks Consultants
Lee & Ro, Inc.
MARRS Services, Inc.
McMillen Jacobs Associates, Inc.
Parsons Environment & Infrastructure Group
Psomas & Associates
Stantec Consulting Services, inc.
